1 Intro and Whatnot

Use `\cref{label}` to get proper linked references within your document, like table 1, as well as figures 1 and 2.

Standard way to use pictures can be seen in figure 1:

Figure 1: Cool pic

More possibility for funky picture placements if you use TikZ:

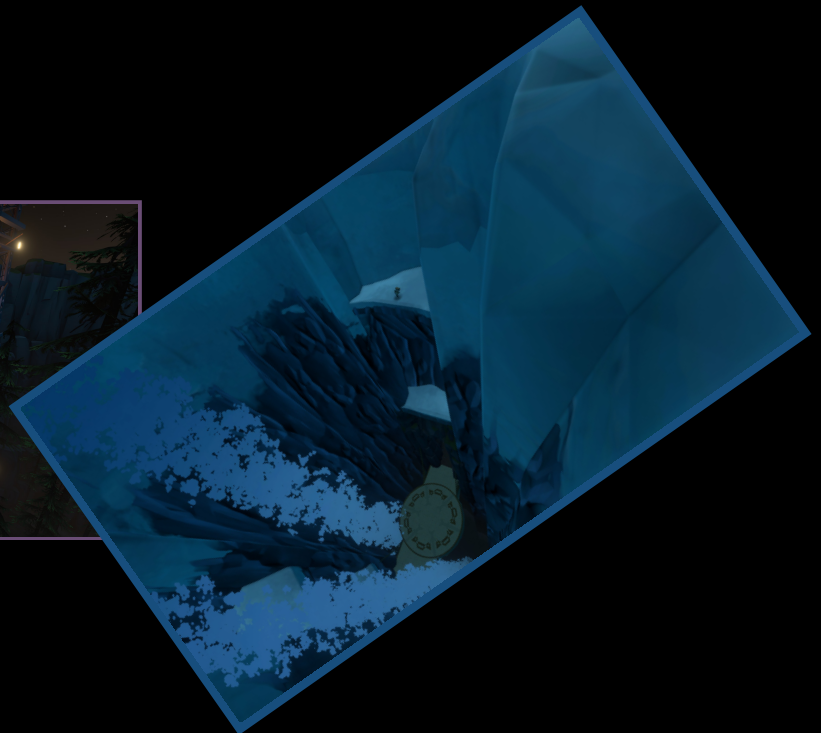

Figure 2: Funky picture options using TikZ nodes (ignore the overfull hbox...)

1.1 Intro

For consistent display of numbers with units, consider using the `\qty{number}{units}` from the `siunitx` package in math-mode, displayed here:

$$\sum_1^n x^2 = 3.334\,509 \times 10^{21} \frac{\text{m}^3}{\text{s}^2} \quad (1)$$

The table style I mostly used (or some variation of this):

Table 1: Super cool table

Heading 1	Heading Number Two
Stuff	Numbers
Stuff	Numbers
Stuff	Numbers

1.2 Whatnot

Behold, the colorpalette courtesy of thepopster55 2022:

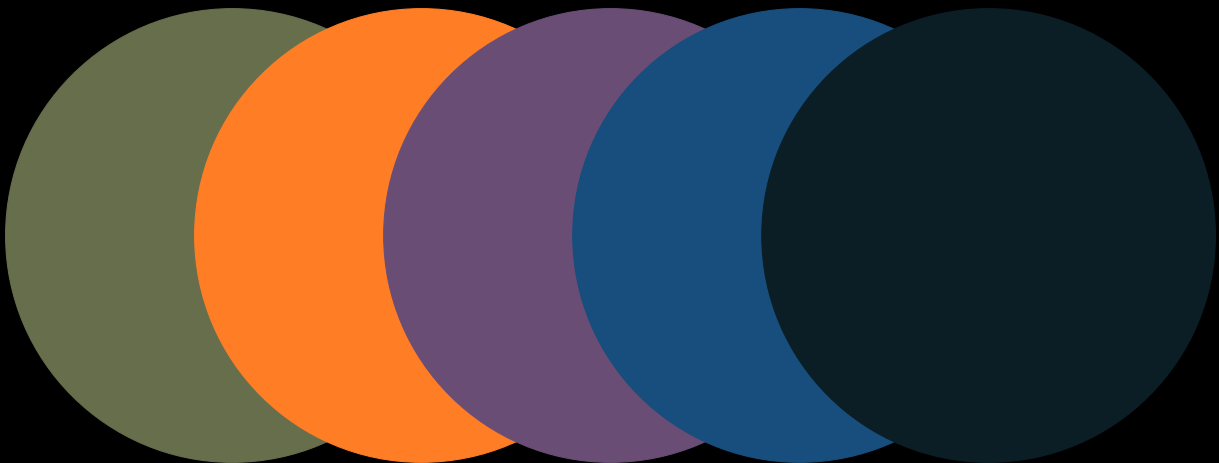

Figure 3: Five different custom colors from the outer wilds palette, from left to right: OWGreen, OWOrange, OWPurple, OWBlue, and OWDark

Using `pgfplots` allows for nifty graphs coded directly in $\text{\LaTeX}$ via TikZ. It is a bit of a hassle, but sometimes worth it.

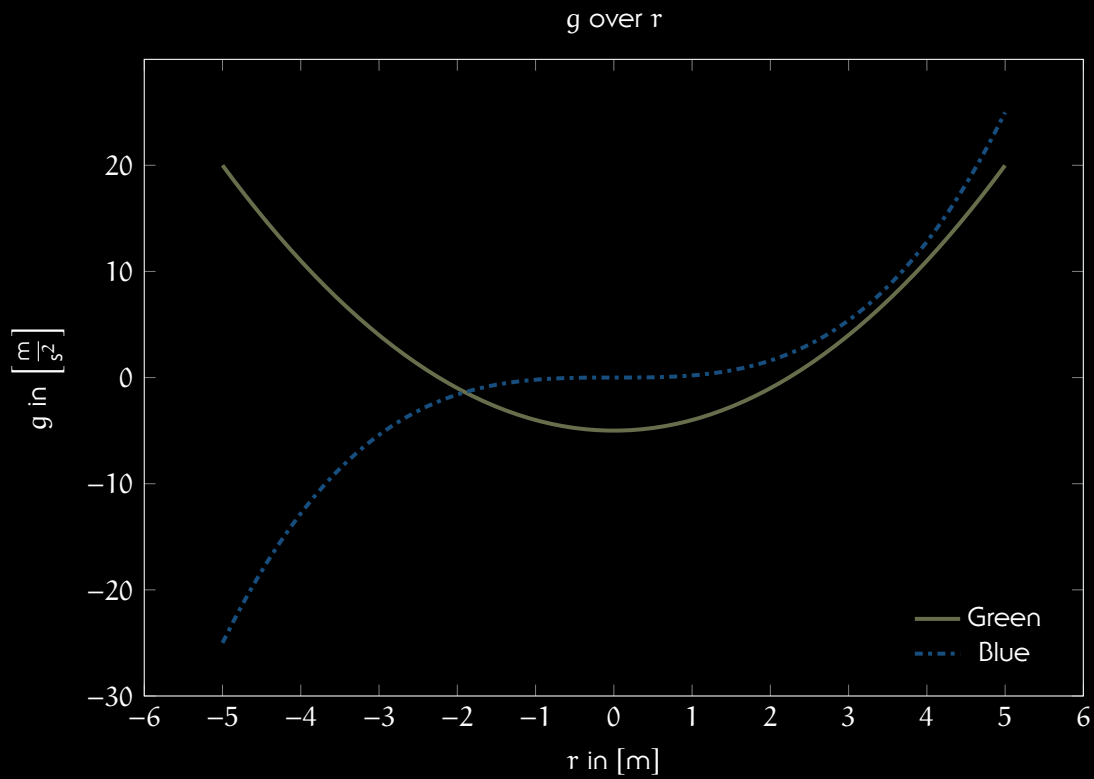

Figure 4: Caption

There is also an `ellipsebyfoci` macro in the preamble, which is useful for drawing elliptic orbits in TikZ. Stolen from [here](#).

2 Super Methodical Mehods

2.1 Mehods

2.1.1 Super Methods

2.1.2 Methodical Methods

3 Results and Numbers (boring)

4 Conclusions (exciting)

4.1 EXCITEMENT!

List of Tables

1	Super cool table	2
---	----------------------------	---

List of Figures

1	Cool pic	1
2	Funky picture options using TikZ nodes (ignore the overfull hbox...) . .	1
3	Five different custom colors from the outer wilds palette, from left to right: OWGreen, OWOrange, OWPurple, OWBlue, and OWDark	2
4	Caption	3
